# BUTE-ZONE Powder

Phenylbutazone Oral Powder

**BUTE-ZONE** (Phenylbutazone) is a nonsteroidal anti-inflammatory drug (NSAID) and cyclo-oxygenase inhibitor. NSAIDs work by inhibiting the body's production of prostaglandins, thromboxane, and other inflammatory mediators. **BUTE-ZONE** is a potent pain reliever, antipyretic, and anti-inflammatory. Pain relief and fever reduction usually start within one to two hours with **BUTE-ZONE**.

In the horse, it is commonly used for lameness, resulting from soft tissue injury, muscle soreness, bone and joint problems, and laminitis.

# BUTE-ZONE

## Powder

Phenylbutazone Oral Powder

### COMPOSITION

Each sachet contains:  
Phenylbutazone BP ..... 1.0 g

### DESCRIPTION

BUTE-ZONE is non-steroidal, analgesic agent with anti-inflammatory (NSAIDs) and antipyretic activity, in easy to measure, easy to feed powder.

### INDICATIONS

BUTE-ZONE for the alleviation of inflammation and pain associated with musculoskeletal disorders in adult horses

### DOSAGE

**Recommended Dosage:**

Treatment Horses: 400-650 Kg

**Day 1:** (8.8mg/kg bodyweight)-4 sachets-2 in morning and 2 in evening.

**Days 2-5:** (4.4mg/kg bodyweight) - 2 sachets per day

**IMPORTANT:** Treatment should not exceed 5 consecutives days

### ADMINISTRATION

Simply sprinkle BUTE-ZONE onto feed. For fussy eaters mix with molasses or corn syrup then mix with feed, apple or a treat.

### OVERDOSAGE

Overdoses of phenylbutazone can cause renal failure, liver injury, bone marrow suppression, and gastric ulceration or perforation. Early signs of toxicity include loss of appetite, and depression.

### SIDE EFFECTS

Adverse side effects from overdose or prolonged use can cause gastro intestinal ulcers, kidney damage, oral lesions, and internal hemorrhage, particularly in young, ill, or stressed horses.
